

# Green Roof Site

## Potential Images Needed/Issues to Address

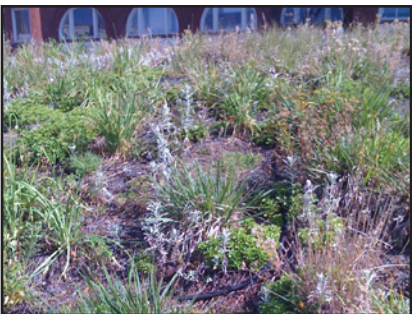

**Grate:** Why is the grate used? (Image: Close up of grate, see plants underneath, another from the top of elevator looking down?)

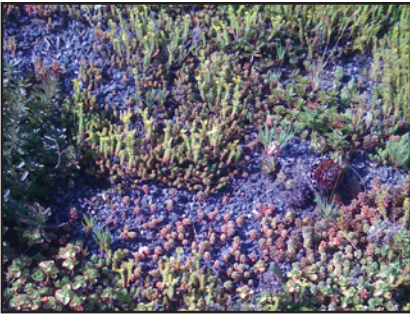

**Plant:** Prickly Pear – Why is there cacti on the green roof? (Image: Close up of cactus)

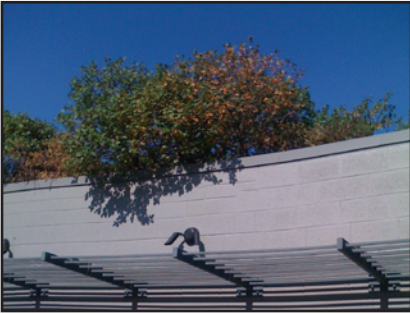

**Plant:** Succulents on North Facing Slope – What is the purpose of using succulents, and only on the North facing slope (Image: Close up of succulents)

**Plant:** South Facing Slope plants - Significance of these plants (Image: Close up of whatever is in bloom?)

**Gravel (on both slopes):** What is the purpose of this (assist in drainage)? Why is it dark in color? (Image: Close up of gravel)

**Trees/Bushes on Elevator:** Why? (Image: View from below looking up?)

**Wood Deck:** Was there a particular wood used for a specific purpose (sustainability)? (Image: Close up of deck or from top of elevator looking down)

**Wave:** Why was this design chosen, does it play any role in drainage? How is the wave made?(Image: Show side of the wave, construction of wave)

**Do we have any images of the infrastructure of the roof?**
